Show Image 2 on 1st side 2nd side both

Substitute (-): [toggle]

Substitute (-): Substitute all occurrences of the question in the answer for "-". For example, if you have a word "right" as the question and the answer includes it, it will be substituted for "-". in most of the tools.

If you want to share this deck through class/shared folders with your students, you can protect it from copying and editing. As an additional option, you can allow students to duplicate locally your protected decks, so the students can keep them after exiting your class folders.

Protection: copying, editing, and exporting are prohibited

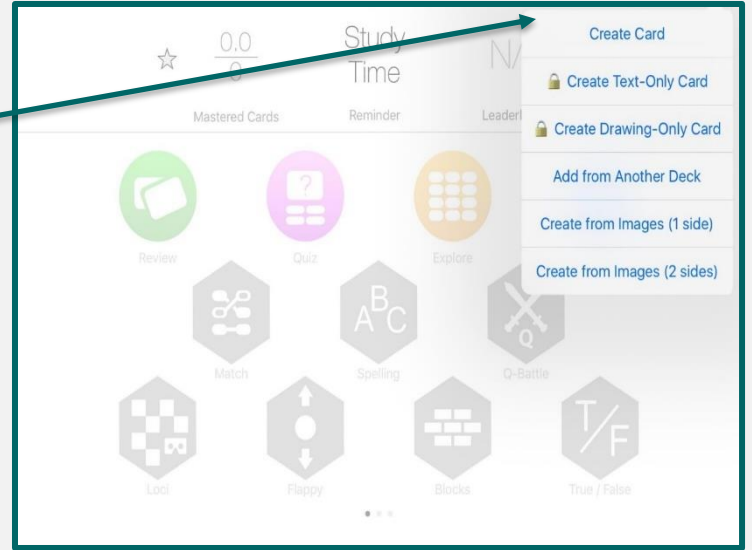

Allow local duplicates: the deck can be duplicate only locally (only the same device)

Note: protection doesn't apply for assistants in class folders

A screenshot of a mobile application dashboard. At the top, there are three main statistics: 'Mastered Cards' with a star icon and a progress circle showing 0.1/9; 'Reminder' with a timer showing 2m 15s; and 'Leaderboard' with 'N/A'. Below these is a link for 'Manage Tools/Games'. The main area contains a grid of 12 game icons: Words, Ninja, Q-Battle LMP, Bingo, Flow, 2048, Dig It Up, Memory, Collage, Letters, and Sort It Out.

A screenshot of the 'Flashcards Maker Pro' app interface. The title 'Flashcards Maker Pro' is displayed in a green banner. Below the title is a list of menu items: 'Decks', 'Statistics', 'Export', 'How to', and 'Full Version', each with a corresponding icon.
